Healthcare *is* Communication

Did you know that the average RingCentral customer **gets paid an extra $12,505 each month per provider by utilizing ChronicCareIQ** and their **patients have 29.4% fewer hospitalizations**?

The RingCentral and ChronicCareIQ partnership enables doctors to keep tabs on patients between visits, collects and analyzes data, and alerts staff to those requiring attention.

Collaboration Benefits
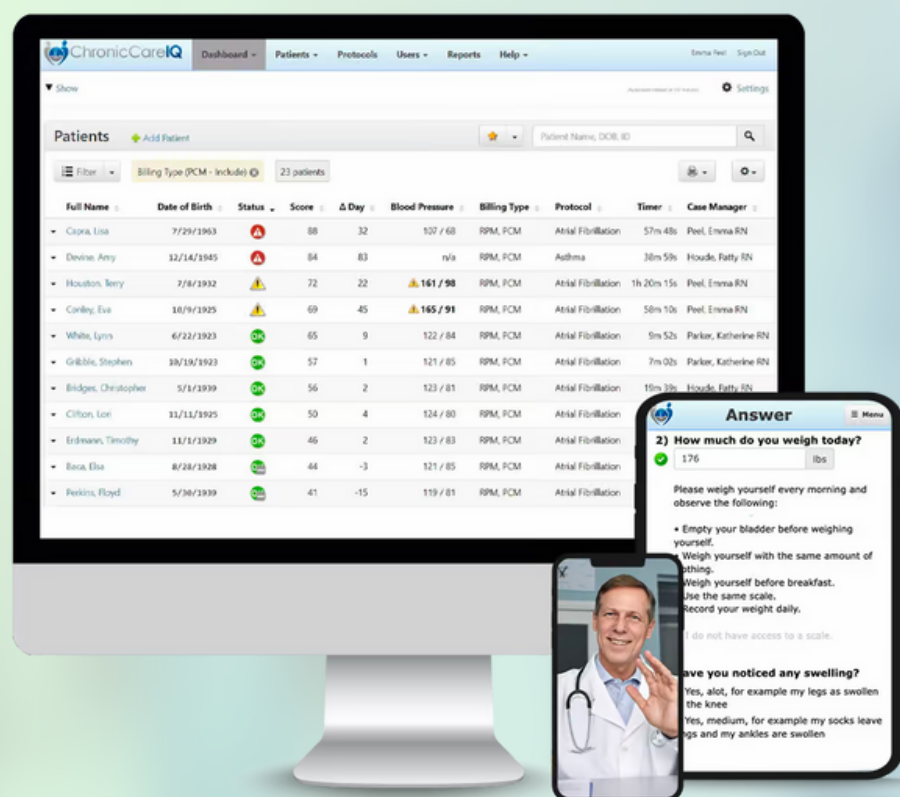

ALREADY PARTNERS

ChronicCareIQ is RingCentral's 2021 Innovator of the Year. We are investing significant resources in expanding in 2024, referring substantial business to RingCentral. Our collaboration has proven mutually beneficial, and we're eager to participate in team calls, account reviews, and much more.

ENHANCING CUSTOMER STICKINESS

Integrating ChronicCareIQ into RingCentral makes the platform "stickier" for customers, reducing the likelihood of switching. This is particularly crucial during renewals, as seen with Home Physicians Group and their tremendous Medicare reimbursement increase.

OPENS/CREATES BUDGET

ChronicCareIQ transforms the phone system from a cost to a revenue source. In a down market, this collaboration allows RingCentral to free up budgets and essentially provide a "free phone system."

Healthcare *is* Communication

Collaboration Strategy

CONSULTATIVE APPROACH

Highlighting value-added programs such as CCM/RPM demonstrates innovative thinking and understanding of the healthcare landscape, positioning RingCentral as a trusted advisor and resource. **Your customers now get paid for their time on the phone!**

EASE OF IMPLEMENTATION

RingCentral is the only UC provider that is turnkey ready with no additional setup on the customer's end. With minimal changes to existing practice workflows, it allows clinical staff to monetize actions through time-based billing codes and robust audit logs - benefiting providers, patients, and RingCentral.
